Photoshop or Elements Tip of the Week

Hide and Seek

Will your little ones be hunting Easter Eggs tomorrow morning? While you can't hide and seek eggs in Photoshop and PSE, it is easy to play hide and seek with layers!

To **hide a layer**, begin by selecting the layer you want to hide. In the Layers Palette, click on that layer's Layer Visibility icon. The **Layer Visibility icon** looks like an eyeball on the far left side of the layer.

This is helpful when you are working on a layer, but Photoshop wants to select the layer above it. You can also use it to hide an item you don't want to use in a Layered Template.

Did you know that you can also hide everything except that layer? When you want to view only one layer, **Alt + Click** on the **Layer Visibility icon**! Photoshop and PSE will hide every layer except the one you want to view!

Have a great week and we'll see you at DesignerDigitals!
