Adobe Photoshop or Adobe Photoshop Elements Tip of the Week:

Free Refills

I'm a sucker for the free refill cups. All winter I enjoy free refills of coffee from the local coffee place, while during the summertime, I'm all about free soda refills. Maybe that's why I like these color-fill tricks in Photoshop and PSE:

- **Alt + Backspace (Mac: Opt + Backspace)** fills your document with the foreground color.
- **Ctrl + Backspace (Mac: Cmd + Backspace)** fills your document with the background color.
- **Shift + Backspace** brings up the Fill Layer Dialog Box where you can choose to fill the document with the background or foreground color, a color of your choice, a pattern, black, white or grey.
- **Ctrl + Shift + Backspace (Mac Cmd + Shift + Backspace)** fills all opaque (non-transparent) pixels of a layer with the background color.
- **Alt + Shift + Backspace (Mac Opt + Shift + Backspace)** fills all opaque (non-transparent) pixels of a layer with the foreground color.

Have a great week and we'll see you at DesignerDigitals!
