### Adobe Photoshop or Elements Tip of the Week:

#### What a Drag!

If you've ever made a selection and then realized it isn't in exactly the right spot, you'll love this tip! It's a real drag to have to try making the selection over and over again until you get it right! Here's how to make Photoshop and PSE work *with* you instead.

When you are using the **Marquee Tool**, drag out a selection. Do not release the mouse. Hold down the **Spacebar** and Photoshop/PSE will let you drag that selection anywhere on your document.

Now you'll be able to get that selection in just the right place without trial and error!

Have a great week and we'll see you at DesignerDigitals!
