Adobe Photoshop or Elements Tip of the Week:

A Scale You Can Love

I have a love-hate relationship with my scale. I love it when it decreases and hate it when it increases. *sigh*

Here's a scale that I like all the time: the Photoshop and PSE font scale shortcut.

Select the text that you want to increase or decrease in size by clicking at the beginning or end of the text and dragging the cursor over the entire block of text.

Press **Ctrl + Shift + >** (Mac Cmd + Shift + >) one or more times one to scale the font size up.

Press **Ctrl + Shift + <** (Mac: Cmd + Shift + <) one or more times to scale the font size down.

Have a great week and we'll see you at DesignerDigitals!

Katie and Randy
