### **Adobe Photoshop or Elements Tip of the Week:**

#### **There's No Place Like Home, (Except the End) Using Shortcuts to Navigate to the Corners of Your Project**

**You can also watch this tip on video on our blog: [Digital Scrapbooking Tips and Tricks: Using Shortcuts to Navigate to the Corners of Your Project](#)**

There's no place like home ... there's no place like home.

As much as I enjoy traveling in the summer, there's nothing quite like the feeling of coming back home to my comfort spot.

When you are working on a digital project in Photoshop and Photoshop Elements, going "home" means reaching the top left corner of your open document. To get there quickly when you are working, press the Home key on your keyboard. The software will reposition the page in the editing window so that you are viewing the top left corner of the document.

Similarly, Photoshop and PSE consider the bottom, right corner the "end" of the document. Pressing the End key on your keyboard will reposition the document so that you are editing the bottom, right corner.

Using these shortcuts will help you quickly navigate to key points on your document.

Have a great week and we'll see you at DesignerDigitals!
